PROFESSIONAL SUMMARY

Second-year BS Statistics (Data Science) student at COMSATS University Lahore with hands-on experience building ML classifiers, multi-source BI dashboards, and responsive web applications. Delivered a maternal health risk classifier achieving 87% accuracy across 1,000+ patient records. Currently developing an enterprise-grade Power BI dashboard integrating 4+ data sources. Brings additional leadership experience managing 20+ volunteers as Scouts In-Charge.

EDUCATION

Bachelor of Science in Statistics — Specialisation: Data Science *Expected 2028*
COMSATS University Islamabad, Lahore Campus

Key coursework: Machine Learning Fundamentals, Data Structures & Algorithms, Probability Theory, Statistical Computing, Data Visualization, Database Systems

TECHNICAL SKILLS

Languages Python, JavaScript, SQL, HTML, CSS
ML / Data Scikit-learn, XGBoost, NumPy, Pandas, Matplotlib, Seaborn, SciPy, Jupyter Notebook
BI & Analytics Power BI, Power Query, DAX, Microsoft Excel (Advanced), Dashboard Design
Web & Tools HTML5, CSS3, JavaScript (ES6+), Git, GitHub, VS Code, Streamlit

PROJECTS

Maternal Health Risk Classifier *Python · Scikit-learn · XGBoost · Pandas · Streamlit*

- Built a multi-class ML classifier predicting maternal risk levels (High / Mid / Low) from patient vitals across 1,000+ records; XGBoost selected as the final model with **87% classification accuracy**.
- Deployed an interactive Streamlit web application featuring gauge-based risk indicators and a patient history analytics page, making outputs accessible to non-technical clinical users.

Enterprise BI Dashboard — Multi-Source Integration *Power BI · Power Query · DAX · SQL · Python* [In Progress]

- Designing a comprehensive business intelligence dashboard integrating **4+ heterogeneous data sources** (Excel, SQL database, web/OData feed, Python script) to simulate a real-world BI consulting engagement.
- Performing end-to-end ETL in Power Query: cleaning missing values, removing duplicates, splitting/merging columns, changing data types, and appending/merging queries across sources.
- Building a star-schema data model with a custom date table and **15+ DAX calculated measures** covering total sales, profit, growth %, customer count, and orders.
- Dashboard includes KPI cards, bar/line/pie/map visuals, matrix tables, drill-through pages, conditional formatting, dynamic titles, bookmarks, and interactive slicers — targeting bonus AI Visuals and forecasting components.

Double Shot — Brand Website *HTML5 · CSS3 · JavaScript*

- Built a fully responsive multi-page business website rendering consistently across 3 device breakpoints using CSS Flexbox/Grid and modern UI design principles.

LEADERSHIP & CERTIFICATIONS

Scouts In-Charge (prev. Finance Director, 2024) *2024 – Present*
Imamia Scout Organization (ISO), Lahore

Lead 20+ volunteers, coordinating community programmes and 5+ annual welfare events; managed annual budget and produced quarterly financial reports as Finance Director.

Certifications: Machine Learning Specialization — DeepLearning.AI / Coursera (*In Progress*) | Power BI Beginner to Advanced — Udemy | Git & GitHub, Agile Fundamentals — Google / Coursera
